

Board Reports

Your file transfer system for your board of directors, audit committees, or any organization where you need to store and share files securely. Have confidence in your data transportation with our hosted solution, protected in our highly redundant virtual environment.

Security

Your files will be hosted in our premier data center with secure transportation and a protected environment. Our data center is backed up in to two separate locations, and your data is always accessible with just an internet connection.

Documents

All the important documents your board needs, secure and organized, all in one place. For additional security, administrators can create folders and set permissions for members to access specific folders or subfolders.

Polls

Create a poll! Ask questions for fellow board members to answer using multiple answer choices. Polls are a great way to get quick answers- Beef or Chicken for lunch? Tuesday or Thursday for the meeting? You can also choose to notify members.

Dashboard

Hosted in our premier data center with secure transportation and a protected environment. See what happened since you last logged in, including recent documents, bulletin posts, comments, polls, and upcoming events.

Bulletin Board

Get in touch with fellow board members by posting and commenting on the Bulletin Board. Ask questions, start a discussion, or just post an announcement for all to see. Choose fellow members to notify that you've made a post!

Meetings/Calendar

View your very own calendar for your board and create new events that can be exported to your personal calendar. Members can also RSVP, and let the group know if they are Attending, Not Attending, or Attending by Conference Call!
