

More ATM Features. Less Administration.

Consumers expect easy access to ATMs that offer all of the self-service options they need. But managing those ATMs in-house may not fit with your business strategy.

Magic Line is the solution.

Magic Line Hosted ATM Intercept Processing & Shared Branch Services delivers all of the advantages of ATM intercept processing through a cost-effective service bureau model. You avoid capital investments. You free your staff to focus on more complex tasks. And you gain the power to use ATMs to expand your footprint, increase self-service and broaden your reach — without taking on more work.

What makes Magic Line different?

This hosted solution delivers extensive ATM capabilities as standard features, not costly add-ons. It's the most robust service bureau ATM intercept processing offering you'll find, bundling high-demand services in a cost-effective package.

Best of all, Magic Line can integrate with any core processing system in the financial services industry. So you can start delivering a better bundle of ATM services faster — and start seeing the results sooner.

How It Works

Magic Line leverages two unrivaled components:

- The proven ATM technology of INTERPRO® Technology, Inc., a leader in providing intercept

processing and shared branch applications to credit unions and other service and financial organizations

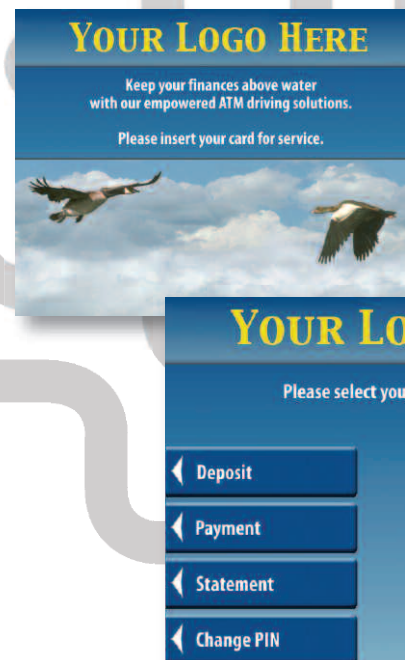

- The established data center infrastructure of United Solutions Company, a leading provider of ASP financial and technology solutions for credit unions and credit union shared service centers

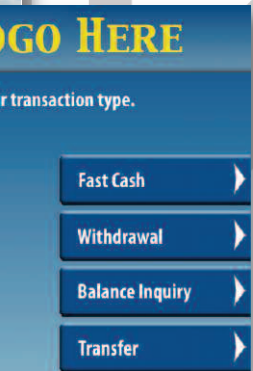

By leveraging INTERPRO's expertise in ATM technology with United Solutions' reliable data center environment, this unmatched offering gives you the flexibility to drive and control your ATMs as you see fit, without the work of an in-house solution. And with our smartphone monitoring application, checking ATM statuses or changing commands is fast and simple!

Business Recovery: Covered

With Magic Line, you turn your ATM business recovery worries over to us. Our disaster recovery co-location takes over in the event of an interruption to your ATMs, ensuring maximum uptime for a channel your members and customers depend on. So you can rest easy!

It's all part of the responsive, personalized, knowledgeable service that INTERPRO and United Solutions are known for across the financial services sector.

Robust Features as Standard!

Other ATM intercept processing solutions deliver the most basic capabilities and charge high fees for add-ons. Magic Line combines all the features you need to compete, in a standard package that offers great value at an affordable price.

Standard features include:

- Real-time monitoring via PC or smartphone: enabling you to check ATM status, change commands and more, remotely or from your desktop
- Remote deposit capture through USC's Capture21.Org
- Bilingual screen support
- Custom-branded welcome screens
- Multiple currency support
- Voice guidance
- PIN change support
- Account-to-account transfers
- Courtesy payment
- Custom fee options
- Extensive reporting capabilities

Optional features (available in an expanded package) include:

- Interactive marketing
- Cardholder preference support
- Advanced security, including neural network monitoring and fraud detection
- Remote key transport
- Shared branch transactions using our "Followme" solution
- Shared branch issuer and acquirer support through our web-based teller system

Put your ATMs to work, without taking on more work in-house. Contact us today at 248-650-8695 or exec@interpro-tech.com.
