

OnCore Suite

United Solutions has recognized the growing digital era. With this recognition we have created OnCore Suite. OnCore Suite integrates with XP2 and DataSafe. OnCore Suite consists of five different modules for credit unions to improve their operations.

Surge

Send targeted marketing campaigns via text or email simply and quickly. The built-in query pulls directly from your core, so you use the most current information with no hassle.

Business Intelligence

Access your USC Business Intelligence reports at the click of a button. Utilize the data to analyze your credit union operations and apply it within our other modules.

Member Relationship Management

Track your member engagements using interactions and opportunities. Whether it's member touch points or cross-sell opportunities, see your metrics on the entire credit union.

Forms

Use OnCore Forms to create your member and loan documents without the hassle of double entry. Pull data directly from the core to prepopulate your documents. Use one of three signing options and export seamlessly to your optical solution.

Chat

Chat with anyone on your team for a seamless collaboration all in OnCore Suite, no need for a separate software.
