

Imaging Services

OUR SERVICES.

Imaging Services prepares, scans and indexes important client documents onto optical archiving equipment installed at United Solution's data center.

Clients may access and print all data via the Internet or T-1 data circuits 24 hours a day, 7 days a week.

United **Solutions**

Organize & secure your documents online. A flexible, but strictly enforced authorization system ensures that access to the archived documents is always under the complete control of the clients' management. The media and database containing all archived data is backed up and stored off-site in a vault for safe keeping.

Examples of documents ideally suited for imaging include: account agreements, loan files, board minutes, contracts, medical records, blueprints, disaster recovery plans, facility management plans and accounting/financial records. USC provides its data processing clients their statements, histories and a vast array of reports online instantly, instead of on paper or microfiche.
